PROFESSIONAL SUMMARY

Front-End Developer and Systems Analysis and Development student at UNINTER with hands-on project experience using React, TypeScript, JavaScript, Next.js, and Tailwind CSS. I build responsive interfaces, integrate APIs, and apply Node.js fundamentals in web applications. I am seeking opportunities to contribute to real products and grow within a team.

SKILLS

Front-End: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Angular, and Tailwind CSS.
Back-End: Node.js, Express, Prisma ORM, MongoDB, Zod, JWT, and bcrypt.
Tools: Git, GitHub, VS Code, npm, pnpm, Vercel, Figma, Postman, Docker, GSAP, and Framer Motion.
Applied AI: GitHub Copilot, ChatGPT/Codex, Claude, and Gemini.

PROJECTS

AuthFlow — Authentication and user management | *React • TypeScript • Node.js • MongoDB*
Full Stack application with login, JWT, bcrypt, protected routes, demo access, and a CRUD dashboard. **Demo** • **Repository**

FlowView — Custom dashboards | *React • TypeScript • Next.js • Recharts*
Finance and marketing dashboards with local data, imports, exports, and interactive charts. **Demo** • **Repository**

FlowStack — Project management | *React • TypeScript • Next.js • Zod*
Kanban boards, demo roles, delivery reviews, reports, and local JSON backups. **Demo** • **Repository**

PROFESSIONAL EXPERIENCE

Merchandise Stocker | **Feb 2025 - May 2026**
- Stocked and organized merchandise and inventory across multiple store departments.
- Supported produce, refrigerated, and frozen-food areas while following routines and priorities.
- Recognized by supervisors for dedication, organization, and reliability.

Volunteer - Interact
- Planned social initiatives, tree planting, and a McDia Feliz fundraising campaign.

EDUCATION

Technology in Systems Analysis and Development — UNINTER | In progress | Started: Oct 2026 | Expected graduation: Apr 2029

CERTIFICATIONS

Completed - DIO: JavaScript Developer Program (Feb 2026), React Developer Program (Jun 2026), Santander 2026 - AI React Front-End (Aug 2026), TypeScript Fullstack Developer Program (Sep 2026), GitHub Copilot Program (Oct 2026), and the 37-hour Angular Developer Program (Oct 2026).
In progress: Node.js Fundamentals Program and English4Tech at DIO; New U-best at UNINTER.
